SterixEco Product Presentation
RESTRUCTURED DISINFECTANT

WHAT IS STERIXECO?

SterixEco is a trusted brand certified in UAE and United Kingdom. Disinfectant liquids are used for personal purposes and indoor/outdoor sanitation being 100% harmless. SterixEco got international accredited approvals in general such as ISO, MSL and Dubai Municipality for industrial usage.

STERIXECO DISINFECTANT LIQUID TECHNOLOGY

SterixEco disinfectant is based on two main ingredients. The first one is chlorine hypochlorous acid-based salt [HOCl] which not only has properties of free-chlorine (in very small amounts 0,4%, because the 99,9% of disinfectant is water). The second main ingredient is a unique hydro gas technology created by our scientists. It is a very potent and deoxidant reducing gas that is produced from water. The hydro gas mixed with the water frees a high amount of electron and provides an electrical charge.

STERIXECO DISINFECTANT KILLS:

- Viruses
- Bacterias
- Spores
- Germs
- Fungus
- Covid-19

STERIXECO IS SAFE FOR HUMANS

SterixEco disinfectant liquid is safe to use, wash with and inhale: it is an incredibly versatile product that can be used for the industrial and in-home needs. SterixEco disinfectant helps UAE citizens and the environment to stay safe and clean being an essential helper for municipalities to protect every single person from being COVID-19 infected.

99% Natural

Eco-friendly

Kills Coronavirus

No skin irritation

Kills 99,9% of germs & viruses

48 hours long-lasting

Multi-purpose usage

Recommended by professionals

CREATED BY PROFESSIONALS

SterixEco production is made by qualified scientists who had invented an unscented disinfectant that is 100% safe for humans and the environment being proven by clinic tests in a well-trusted United Arab Emirates Medical Center.

Main Ingredients:

99,95% – Hydrogas restructured drinking R.O.

water 0,05%<= – Hypochlorous Acid Salt

(sodium hypochlorite base) 6.2-8.8 – Product pH

MULTI-PURPOSE DISINFECTING STERIXGATE

SterixGate is the disinfection channel to protect the entrances in any public place. A multipurpose gate which uses SterixEco restructured disinfectant liquid.

When a person enters the gate it scans the body temperature in a contactless way and alerts if it is higher than normal. After the temperature test is done there is a process of full disinfection including hands, body, and shoes. SterixGate guarantees full protection of any kind of germs and kills 99,9% of viruses.

Automatic alarm when human body temperature is higher than 37.3°C (customizable temperature value)
Supports automatic alarm for abnormal body temperature, and the detection result is output within 1 second.

STERIXECO GATE COMES
WITH INDUCTION, WASH HANDS

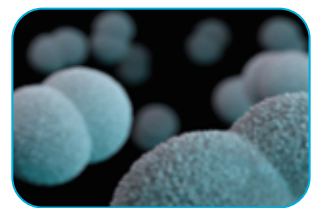

NON-ALCOHOL DISINFECTION

- Special non-alcohol sterilizer for hands
- Non-alcohol induction spray, safe and hygienic, which can effectively sterilize the hands

FOOD GRADE INTELLIGENT INDUCTION DISINFECTION

- Quick disinfection of virus in the disinfection area
